Note: It is the aim of this report to show you the steps you can take very quickly to go from making a small income with virtually no investment of time or money, to building a solid online business which gives you a growing monthly income from many sources you can set up and add to as your activities expand over time.

You are advised to try and follow the suggested steps quickly so you will gain all the skills and insights to go through these steps on your own. Don't hesitate to ask the person who provided you this report, to help you along so you can become the source of help to the ones who will be receiving this report from you.

Step 1.

Free Money Making Tools

I like to start with two tools which will be both, educational and practical, while producing an income for you. To receive cash online, you should have your own **PayPal Account** so you can include your Account ID in the profile you create during registration:

1. **A nice communications program** - it's better than Skype and you get paid. You will also be able to use it to keep in touch so you can work with your potential clients and future customers.

Click the following link to register and get started ... **Right here!**

2. **Make money automatically** – get yourself this special report on 10 ways of earning \$10,000 a month, or more. It has 10 examples for you with 10 related ClickBank products you can study to help you get started making some serious money. You can re-brand the report with your own ClickBank ID so you will be making the CB Commissions on all 10 products when passing on the free report as your own promotional tool.

Step 2.

Selling Online Made Easy

Here again is a link to **PayPal** should you still have to open an account with them. There is a new payment method you can use which makes it very easy for you to get paid online. The following **Twitter** message is an example ...
